

CLAIMS

What is claimed is:

1. A refrigerator provided with at least one storage chamber and a door for opening and closing the storage chamber, wherein the door comprises:
 - 5 a frame for defining a main body of the door;
 - both side covers for covering both side surfaces of the frame; and
 - upper and lower covers for covering upper and lower surfaces of the frame, wherein the upper and lower covers include a first connection portion connected to at least one of both side covers, and at least one of both side covers includes a
 - 10 second connection portion corresponding to the first connection portion.
2. The refrigerator according to claim 1, wherein the first connection portion includes holes, and the second connection portion include protuberances inserted into the holes.
 - 15 3. The refrigerator according to claim 2, wherein the holes are prepared in pairs and positioned at both side ends of the upper and lower covers, and the protuberances are prepared in pairs and positioned at upper and lower ends of both side covers.
 - 20 4. The refrigerator according to claim 1, wherein a grip is formed integrally with one of both side covers.
 5. A refrigerator provided with at least one storage chamber and a door for
- 25 opening and closing the storage chamber, wherein the door comprises:
 - a frame;

upper and lower covers for covering upper and lower surfaces of the frame; and both side covers for covering both side surfaces of the frame,
wherein the upper and lower covers include holes, and both side covers include protuberances inserted into the holes.

5

6. The refrigerator according to claim 5, wherein the holes are formed at both side ends of the front surfaces of the upper and lower covers so as to have a designated depth and width, and the protuberances are formed at upper and lower ends of the front surfaces of both side surfaces so as to have a depth and width
10 corresponding to those of the holes.

7. The refrigerator according to claim 5, wherein a grip is formed integrally with one of both side covers, opposite to a hinge shaft of the door.
